SPRING 2020

MARCH 2019 - Extra Measures

The start of March saw the unfortunate rise in Covid-19 or 'Coronavirus' which put the country in lockdown.

At Dementia Care TLC, we have been putting measures in place to ensure that all of our clients and staff are protected.

All staff wear visors, masks, aprons and gloves and care has been restricted to necessary care only. Temperatures of carers are recorded daily to keep on top of early symptom signs and we assure you that we take all of these measures seriously.

If you'd like to find out more on how we are operating during these times, please see our Covid-19 Safety Measures on our website which includes guidelines on what you need to be doing to ensure you do not spread the virus.

APRIL 2019 - Overwhelming Generosity

We have had some incredibly generous people helping with PPE production from around the country.

First, we have Nicola Stent (bottom left) who works at Weston college making masks with filters for all of our staff. She has even created a Youtube video on how to make a face mask which is well worth a watch if you'd like to make one for yourself or your family.

Secondly, we have Sue Scott (bottom right) who has kindly been in contact to produce PPE for all of our staff and has been providing more PPE around the country for other organisations too.

What a wonderful bunch of people!
